DETAILED ACTION

The action is final.

Pending claims 18-38 and 40-60 are examined below.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 18-38 and 40-60 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Jahns et al. (6,558,382).

Jahns discloses methods of creating transmural lesions (col. 7:64-66, col. 8:57-64) in the heart, including endocardial or epicardial tissue (col. 4:62-64), using suction (col. 1:10-15; col. 2:43-46; col. 12:62-65), mapping (col. 3:48-61; col. 9:61-62), percutaneous/extravascular access (col. 12:51-57), intravascular access (col. 5:43-45 – "closed heart ablation procedure";), a cannula (col. 20:2, col. 24:33 – "port-access approach"), ablative elements (22, col. 5:1-3; 422; col. 9:14-30), and ground elements (23, col. 5:12-17; 423; col. 9:14-30) all with references to different heart chambers (col.

Application/Control Number: 10/660,858

Art Unit: 3739

4:60-64); "within the body cavity" [of the heart] includes heart chambers (atria, ventricles)), and the coronary sinus (col. 19:48-55).

Response to Arguments

Applicant's arguments filed 1-12-06 have been fully considered but they are not persuasive. Jahns indeed discloses placing a ground element / indifferent electrode adjacent opposing surfaces as depicted in figure 3, where the ground element / indifferent electrode 322 is placed adjacent an opposing surface (left side of 360) to elelctrode 342 placed adjacent an opposing surface (right side of 360). (344 separates right and left 360). Also see col. 11:59-65, especially, "or another site other than the ablation site," in reference to placement of the ground element / indifferent electrode.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 3739

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Peter J. Vrettakos whose telephone number is 571-272-4775. The examiner can normally be reached on M-F 9-6.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Linda C. Dvorak can be reached on 571-272-4764. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
